AMERICAN MEDALS.

Closing numbers refer to size in American scale.

NOTE. Nos. 111 to 131 inclusive are *each and every one warranted unique combinations*, struck about 1876. *The obverse die being destroyed, none can be duplicated.* It may be proper to explain that they were struck by a well known medalist for his own private cabinet, without the least expectation on his part that they would ever fall into the hands of a coin dealer! BECKER'S FORGERIES OF ANCIENT COINS.

- 14 1/2 655 Magnificent impressions in type metal of the ancient Hellenic moneys, including copies of the most rare and desirable coins of Campania, Apulia, Calabria, Lucania, Bruttium, Sicily, Thracia, Macedonia, Epirus, Phocis, Attica, Arcadia, Creta, Syria, Phoenicia, Judea, Egypt, etc. etc. All numbered and described from M. Pinder's work, "Die Beckerschen Falschen Münzen." Complete set, lacking only Nos. 82 and 121. 131 pieces

The following copies of Roman Gold and Silver coins, likewise from Becker's dies, are struck in Copper. They came to me through a distinguished collector in California, who purchased them in Germany. The original letter of the German owner, now in my possession, states that Becker struck these for a friend, but that owing to the brittleness and hardness of the metal and consequent fear of the breaking of the dies, no duplicates,—and, in fact, no more,—were struck, and that these are consequently unique. Per contra, Pinder, in the preface of his work, states that Becker struck gold and silver moneys in copper, but his statement is qualified;—at any rate, it may be assumed without fear of contradiction, that none of Becker's dies have since his death been used except to strike samples of his coins in soft metal, and that, if they had been, the coins produced would have a totally different appearance. The metal, color, and general appearance stamp these coins as the direct work of Becker,—not restrikes; and to this point especially I invite the attention of collectors of ancient coins. Each number being fully described in accompanying slip, I omit descriptions of accessories, the transposition of legends, etc. The references are 1, to Pinder's list of numbers; 2, to Mionnet's work "*De la rareté et du prix des Médailles Romaines. Seconde édition, Paris, 1827,*" where full descriptions of the original gold and silver coins, of which these are copies, may be found: and 3d, I indicate by AV. or AR. that the originals are found in gold, silver, or either.
